WELLESLEY COLLEGE

Wellesley, Massachusetts

FOUNDATION AND PURPOSE

WELLESLEY COLLEGE was established for the purpose of furnishing to young women who desire to obtain a liberal education such advantages and facilities as are enjoyed in institutions of the highest grade. The first building of the College, erected and equipped under the supervision and through the personal means of the founder, was opened to students in 1875, with the announced purpose "of giving to young women opportunities for education equivalent to those usually provided in colleges for young men." Throughout his work the founder aimed to put into visible form his ideal of the higher education for women, "the supreme development and unfolding of every power and faculty."

By the charter, granted by the Commonwealth of Massachusetts, "the corporation of Wellesley College is authorized to grant such honorary testimonials, and confer such honors, degrees, and diplomas, as are granted or conferred by any University, College, or Seminary of learning in this Commonwealth; and the diplomas so granted shall entitle the possessors to the immunities and privileges allowed by usage or statute to the possessors of like diplomas from any University, College, or Seminary of learning in this Commonwealth."

In accordance with the spirit of the founder, the College is undenominational, but distinctively Christian in its influence, discipline, and instruction.

The members of the College meet daily for morning prayers in the beautiful chapel presented in 1899 by Miss Elizabeth G. Houghton and Mr. Clement S. Houghton as a memorial to their father. Services on Sunday are conducted in this chapel by preachers of different denominations. At all these services and at vespers on Sunday, the singing is led by a trained choir of students under the direction of the professor of music.

The Wellesley College Christian Association, organized to foster religious life, and interest in social reforms and in home and foreign service holds meetings for prayer and religious instruction.

The department of Biblical History affords the systematic study of the Bible required of all students.

ADMISSION

In order to qualify for admission to Wellesley College an applicant must be at least sixteen years of age and must present satisfactory evidence of her ability to make good use of the opportunities offered by the College. This evidence must include satisfactory testimonials concerning character, health, and scholarship.

Applications for admission should be made upon forms which will be furnished on request. An application fee of \$10 is required of all applicants and no registration is recorded until this fee is received. (See page 125.) The date of application is used as a basis in assigning rooms in college houses. Since the number of students to be admitted is limited by the capacity of class rooms, it is necessary to close the regular application list several years in advance. After the regular list for a given year is closed, promising students may be registered on a competitive list. The date of application will not be considered in admitting from this list, but the Board of Admission will select the candidates who, from the evidence submitted, seem to be the best qualified to profit by a course of study at Wellesley College.

Beginning with September 1929, candidates will be accepted in the order of the excellence of the credentials submitted. The advantage of an early application will still hold, since rooms will be assigned to accepted candidates according to the date of application for admission.

ADMISSION TO THE FRESHMAN CLASS

For admission to the freshman class a candidate must present fifteen units* of secondary school studies chosen according to the following plan:

Group I. Prescribed without choice, 9 units:	
English	3
Mathematics	3
Algebra 2	
Plane Geometry 1	
Latin	3
Group II. Restricted Electives, 3 units:	
History	1
Two units chosen from foreign language	2
or	
Science	2
or	
Science 1 and a second unit of History 1	2

*A unit represents a year's study of a subject constituting approximately a quarter of a full year's work or not less than the equivalent of 120 sixty-minute hours of classroom work, two hours of laboratory work counting as one hour of classroom work.

Group III. Free Electives, 3 units.

Candidates entering by the *Comprehensive Plan* (See page 20), who wish to offer subjects for admission in which examinations are not given by the College Entrance Examination Board are advised to submit the plan for their free electives to the Board of Admission before the beginning of the last year of their preparation for college. Subjects for the four Comprehensive examinations must be chosen from the list of examinations offered by the College Entrance Examination Board.

Attention is called to the fact that the free margin can be used without limitation only by candidates who enter by the comprehensive plan in which four comprehensive examinations are considered in connection with the school record. Candidates for admission by *examination in all subjects* must choose the free electives from subjects in which entrance examinations are regularly offered. These subjects include the following:

Foreign Language:

French	2-4 units
German	2-4 units
Greek	2-3 units
Italian	2-4 units
Latin a	4th unit
Spanish	2-4 units

Mathematics:

Solid Geometry	$\frac{1}{2}$ unit
Trigonometry	$\frac{1}{2}$ unit
Advanced Algebra	$\frac{1}{2}$ unit

History:

American	1 unit
Ancient	1 unit
English	1 unit
European	1 unit

Science:

Biology	1 unit
Botany	1 unit
Chemistry	1 unit
Physical Geography	1 unit
Physics	1 unit
Zoology	1 unit

Biblical History and Literature . 1 unit

Civil Government 1 unit

Drawing:

Freehand	1 unit
Mechanical	1 unit

Harmony 1 unit

A place on the list of candidates for admission will not be reserved for an applicant whose credentials filed in July do not satisfactorily cover twelve of the fifteen units required for admission. The assignment of a room in a college dormitory to a student who is conditioned in any subject does not insure admission since the Board of Admission require examinations in September in all units not satisfactorily covered, and reserve the right to exclude any candidate whose preparation is, in their judgment, so defective as to debar her from carrying successfully the work of the freshman year. A candidate cannot be assured of admission who is conditioned in even one unit.

A statement from the applicant's physician to the effect that she is organically sound and in good health, together with a certificate of vaccination must be filed with the Secretary to the Board of Admission before June 1 of the year in which admission is sought. Blank forms for these health reports will be sent to each registered applicant in the spring previous to her proposed entrance. Before a candidate is formally accepted she is given a thorough physical examination. The College reserves the right to reject any candidate if the results of this examination in the opinion of the medical staff justify such action or to accept the candidate only on the understanding that she will take five years to complete the course.

The student who has met all entrance requirements is qualified for immediate matriculation for the Baccalaureate degree in Arts.

All communications concerning admission should be addressed to the Secretary to the Board of Admission, Wellesley College, Wellesley, Mass.

METHODS OF ADMISSION

I. The Comprehensive Plan of Admission.—It is believed that this type of admission combines the best elements of the certificate system and of the examination system in that it requires the school record and estimate of character, and also demands four examinations designed to test the candidate's intellectual power, not alone her memory of prescribed facts. Furthermore, the method offers the applicant the fullest opportunity to show her ability in subjects in which she believes herself best qualified.

The plan offers a uniform method of admission for the colleges which have adopted the plan, and gives the school entire freedom in the sequence of its work, making no requirements of certain subjects in the last year.

The examinations required in this plan are of the type known as comprehensive examinations offered by the College Entrance Examination Board.

Admission by this method depends on two kinds of evidence:

1. Evidence submitted by the school, as follows: (1) a school report covering the entire record of subjects and grades for four years; (2) a statement from the school principal including an estimate of the applicant's scholarly interests, special ability, and character.

2. Evidence submitted by the candidate, consisting of four comprehensive examinations, selected from each of the following groups: (1) English or History, selected by the applicant; (2) a foreign language, selected by the applicant; (3) Mathematics, or Chemistry, or Physics, selected by the applicant; (4) a fourth subject designated by the applicant from the subjects which may be offered for admission. This choice must be approved by the Committee on Admission of the respective colleges.

These four examinations must be taken in one examination season. At least two examinations must cover more than two admission units each. In each subject chosen except history the applicant must take the comprehensive examination covering all the units offered by her for admission.

It is desirable that applicants furnish school records and state the subjects selected for examination before February fifteenth of the year in which the examinations are to be taken.

The Committee on Admission of the individual college must give its permission, based upon the evidence submitted by the school, before the applicant may take the examinations. The comprehensive examinations set by the College Entrance Examination Board are judged by readers appointed by this Board, and forwarded to the individual college for final decision by the college Committee on Admission.

Under the comprehensive plan the candidate, if admitted to college, will be admitted free from all conditions. Failure to meet completely the standard in both kinds of evidence required will not necessarily involve rejection of the applicant; the Committee may accept unusual excellence in one part of the credentials submitted as offsetting unsatisfactory evidence or even failure in another part. If the candidate fails of admission in June she may be permitted to take examinations under the old system in September, but she may not take the examinations for admission under the comprehensive plan before June of the following year.

The comprehensive examinations are conducted in June by the College Entrance Examination Board. Information concerning the character and scope of the examinations will be found in Document 114 of the College Entrance Examination Board.

II. Examinations in All Subjects.—Candidates must take all examinations in June, except such as by permission may be postponed until September. The admission examinations conducted at Wellesley College in June are the examinations of the College Entrance Examination Board of which Wellesley College is a member. These examinations will be held June 15-20, 1925.

The College Entrance Examination Board will furnish a list of other places at which these examinations will be conducted.

Students entering by examination in all subjects may take either ordinary or comprehensive examinations of the College Entrance Examination Board. The examinations which are accepted in English, Latin and Mathematics are indicated below. For other subjects except Biblical History and Harmony applicants should consult the list of examinations published by the College Entrance Examination Board in Document 114.

SUBJECT	No. OF UNITS	COLLEGE BOARD EXAMINATIONS

*If Latin 6 is offered as a preliminary examination Latin 1 is not required.

Entrance examinations in Biblical History and Harmony will be conducted by Wellesley College. Applications for these two examinations must be made to the Secretary to the Board of Admission of Wellesley College by May 1.

Examinations for students entering by examination in all subjects may be taken in two or more successive years. Students are advised to take final examinations in subjects which they expect to continue in college.

All applications for examinations, and all other inquiries must be addressed to the Secretary of the College Entrance Examination Board, 431 West 117th St., New York, N. Y. Applications must be made upon a blank form to be obtained from the Secretary of the College Entrance Examination Board.

A list of places at which the examinations are held is published about March 1. In order that they may receive proper consideration, requests that the examinations be held at particular points should be transmitted to the Secretary of the College Entrance Examination Board *not later than February 1*.

Applications for examination at points in the United States east of the Mississippi River or on the Mississippi River, must be received by the Secretary on or before Monday, May 25, 1925, applications for admission to examination elsewhere in the United States or in Canada must be received on or before Monday, May 18, 1925, and applications for examination at points outside the United States and Canada must be received on or before Monday, May 4, 1925.

Applications received later than the dates named will be accepted when it is possible to arrange for the examination of the candidates concerned, but only upon payment of an additional fee.

If the application is received sufficiently early the examination fee is *nine* dollars for all candidates examined at points in the United States and Canada, and *twenty* dollars for all candidates examined elsewhere. The fee should be remitted by postal order, express order, or draft on New York to the order of the College Entrance Examination Board.

Full information concerning the scope and character of each of the examinations may be found in Document 114, published by the College Entrance Examination Board. Upon request a single copy of this document will be sent to any teacher without charge. In general a charge of twenty cents, which may be remitted in postage, will be made.

DEFINITION OF REQUIREMENTS

The number enclosed in parentheses following the subject indicates the number of units assigned to that subject; that is, the number of years with five recitations a week which will normally be required in the secondary school for adequate preparation in the subject.

ENGLISH (3)

The study of English in school has two main objects: (1) command of correct and clear English, spoken and written; (2) ability to read with accuracy, intelligence, and appreciation, and the development of the habit of reading good literature with enjoyment.

Grammar and Composition.— English grammar should ordinarily be reviewed in the secondary school; and correct spelling and grammatical accuracy should be rigorously exacted in connection with all written work during the four years. The principles of English composition governing punctuation, the use of words, sentences, and paragraphs should be thoroughly mastered; and practice in composition, oral as well as written, should extend throughout the secondary school period. Written exercises may well comprise letter-writing, narration, description, and easy exposition and argument. It is advisable that subjects for this work be taken from the student's personal experience, general knowledge, and studies other than English, as well as from her reading in literature. Finally, special instruction in language and composition should be accompanied by

concerted effort of teachers in all branches to cultivate in the student the habit of using good English in her recitations and various exercises, whether oral or written.

To meet the requirement in Composition, there should be practice in writing equivalent to weekly themes the first two years, and fortnightly themes the last two years of the preparatory course. Themes should be accompanied by simple outlines. The following books are suggested: Scott and Denney's *Composition—Rhetoric*; Neal's *Thought Building in Composition*; Robins and Perkins' *Introduction to the Study of Rhetoric* supplemented by Herrick and Damon's *Composition and Rhetoric*; Shackford and Judson's *Composition—Rhetoric—Literature*; Manly and Rickert's *The Writing of English*.

Literature.—The second object is sought by means of the reading and study of a number of books, from which may be framed a progressive course in literature covering four years. The student should be trained in reading aloud and be encouraged to commit to memory notable passages both in verse and in prose. As an aid to literary appreciation, she is further advised to acquaint herself with the most important facts in the lives of the authors whose works she reads and with their place in literary history. A few of these books should be read with special care, greater stress being laid upon form and style, the exact meaning of words and phrases, and the understanding of allusions.

A list of the books recommended for reading and study and suggestions concerning preparation for the College Board examinations in English will be found in Document 114 published by the College Entrance Examination Board.

HISTORY (1, 2 or 3)

All applicants for admission are required to offer one unit in History. One or two units of History may be offered in the group of restricted electives and the subjects should be selected from the following: (1) American History (with or without Civil Government), (2) Ancient History, (3) English History, (4) European History. For suggestions about preparation in History and the scope of the College Board examinations candidates are referred to Document 114 published by the College Entrance Examination Board.

MATHEMATICS (3 or 4)

Algebra.—Factors, Common Divisors and Multiples, Ratio and Proportion, Theory of Exponents including Imaginaries, Radicals and Equations involving Radicals, Inequalities, Quadratic Equations (including the theory), Binomial Theorem, Arithmetic and Geometric Progressions, Graphical Methods.

Plane Geometry.—As found in Chauvenet, or its equivalent.

Deficiency in preparation usually results from one or more of the following causes: the use of text-books which are too elementary, insufficient

time spent in preparation, neglect of exercises in original demonstration in Geometry, and of reviews in both Algebra and Geometry. It is strongly urged that there be constant exercise in original demonstration in Geometry, with frequent written examinations in both Algebra and Geometry, the problems proposed being drawn from other sources than the text-books.

Candidates who wish to offer the new three-year course in Mathematics, which includes in addition to Elementary Algebra and Plane Geometry the elements of Plane Trigonometry, are referred for information concerning the topics to be studied to the New Requirements in Mathematics described in Document 114, published by the College Entrance Examination Board.

Solid Geometry and Trigonometry.—The requirement is met by the courses outlined in the report of the College Entrance Examination Board, Document 114.

LATIN (3 or 4)

4 Unit Requirement.—Candidates should be familiar with the forms and syntax of the language and possess a vocabulary sufficient to translate Latin into idiomatic English and English into correct Latin. They should also be able to translate at sight Latin prose and poetry of moderate difficulty and to read Latin prose and verse according to the Roman method of pronunciation with strict attention to vowel quantities. To attain such proficiency not less than five forty-minute periods a week for four years should be given to the study of Latin. The *amount* of prepared reading should not be less than four books of Cæsar's *Gallic War*, seven orations of Cicero (counting the *Manilian Law* as two) and six books of Virgil's *Æneid*. The reading may be selected from other works of the authors named above or from other suitable authors, but must include the *pro Archia* and two other orations of Cicero and two books of the *Æneid*.

The ordinary examinations of the College Board which are used by candidates taking examinations in all subjects will be based on the following prescribed reading:

In 1924 and 1925. Cicero, the fourth oration against *Catiline* and the oration for the *Manilian Law*; Virgil, *Æneid*, I and IV; Ovid, *Metamorphoses*, Book III, 1-37 (Cadmus); IV, 55-166 (Pyramus and Thisbe), and 663-764 (Perseus and Andromeda); VI, 165-312 (Niobe); VIII, 183-235 (Daedalus and Icarus); X, 1-77 (Orpheus and Eurydice); XI, 85-145 (Midas).

In 1926, 1927, and 1928. Cicero, the first oration against *Catiline*, the oration for *Archias*, and the impeachment of *Verres*, *Actio Secunda*, IV, ch. 52-60 (The Plunder of Syracuse); Virgil, *Æneid*, III and VI; Ovid, *Metamorphoses*, Book I, 313-415 (Deucalion and Pyrrha); II, 1-328 (Phaethon); VII, 1-158 (The Golden Fleece); VIII, 616-724, (Philemon and Baucis); X, 560-680 (Atalanta's Race).

Accompanying the different passages will be questions on the subject-matter, literary and historical allusions, and prosody. Every paper in which passages from the prescribed reading are set for translation will contain also one or more passages for translation at sight; and candidates must deal satisfactorily with both parts of the paper, or they will not be given credit for either part.

Information concerning the character of the Comprehensive examination in four units of Latin and suggestions concerning preparation will be found in Document 114, published by the College Entrance Examination Board.

3 Unit Requirement.—The course of study for the first two years is the same as for candidates offering four units of Latin for admission. In the third year either the prose authors or the poetry may be offered. The required amounts of reading in both the prose and poetry are indicated under the four-unit requirement. Constant practice in Latin writing is essential. Suggestions for study will be found in Document 114 referred to above.

SUGGESTIONS CONCERNING PREPARATION.—Exercises in translation at sight should begin in school with the first lessons in which Latin sentences of any length occur, and should continue throughout the course with sufficient frequency to insure correct methods of work on the part of the student. From the outset particular attention should be given to developing the ability to take in the meaning of each word—and so, gradually, of the whole sentence—just as it stands; the sentence should be read and understood in the order of the original, with full appreciation of the force of each word as it comes, so far as this can be known or inferred from that which has preceded, and from the form and the position of the word itself. The habit of reading in this way should be encouraged and cultivated as the best preparation for all the translating that the student has to do. No translation, however, should be a mechanical metaphor, nor should it be a mere loose paraphrase. The full meaning of the passage to be translated, gathered in the way described above, should finally be expressed in clear and natural English.

It is of special importance that practice in writing easy Latin *at sight* should be continued *throughout the entire period of preparation* in connection with the reading of the Latin authors. In the last year special attention should be given to translating continuous English into Latin both in the prepared and sight work.

A written examination cannot test the ear or tongue, but proper instruction in any language will necessarily include the training of both. The school work in Latin, therefore, should include much reading aloud, writing from dictation, and translation from the teacher's reading. Learning suitable passages by heart is also very useful, and should be more practiced. The work in composition should give the student a better understanding of the Latin she is reading at the time, and greater facility

in reading. The teachers of Latin in the preparatory schools are urged to insist upon the use of good English in translation.

The study of Greek is strongly recommended to candidates who plan to elect courses in Latin in college. Ability to read at sight easy French or German prose is of great advantage to all classical students.

FRENCH (2, 3 or 4)

The requirements follow the recommendations of the Modern Language Association embodied in Document 114 of the College Entrance Examination Board. To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation. The following general suggestions concerning preparation are offered:

(1) Emphasis should be laid on the correct daily use of the spoken language in the class room, on the correct and intelligent reading of French (apart from translation) and on direct composition, including the writing of short themes in French. (2) From the outset particular attention should be given to developing the ability to take in the meaning of each word—and so, gradually, of the whole sentence—just as it stands; the sentence should be read and understood in the order of the original, with full appreciation of the force of each word as it comes, so far as this can be known or inferred from that which has preceded, and from the form and the position of the word itself. The habit of reading in this way should be encouraged and cultivated as the best preparation for all the work that the student has to do. (3) It is particularly urged that the reading be chosen *from nineteenth century writers of prose, verse, and drama*, and if possible from more than five authors.

The texts suggested are:—(1) For the two unit requirement: Laboulaye: *Contes bleus*; Daudet: *Trois Contes Choisis*; France: *Abeille*; Malot: *Sans Famille*; de la Brète: *Mon Oncle et Mon Curé*; Enault: *Le Chien du Capitaine*; Legouv   et Labiche: *La Cigale chez les Fourmis*; Daudet: *Choix d'Extraits*, or *Le Petit Chose*; Vigny: *La Canne de Jonc*; Augier: *Le Gendre de M. Poirier*; Foncin: *Le Pays de France*, or Lavis  : *Histoire de France, IIe ann   * (Armand Colin, Paris). (2) For the 3 unit requirement: Lamartine: *Sc  nes de la R  volution fran  aise*; Maupassant: *Huit Contes Choisis*; About: *Le Roi des Montagnes*; Balzac: *Le Cur   de Tours*; Colin: *Contes et Sayn  tes*; Colin: *Advanced Sight Translation*; Sandeau: *Mlle. de la Seigli  re*; Scribe et Legouv  : *Bataille de Dames*.

GERMAN (2, 3 or 4)

The requirements follow the recommendations of the Modern Language Association embodied in Document 114 of the College Entrance Examination Board. To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation. The following general suggestions concerning preparation are offered:

(1) The books selected for class study should be thoroughly German in character and content. Intensive work on a comparatively small number of pages is preferred to a more superficial study of a larger number of pages. For the two unit requirement the number of pages read in class should, in general, not exceed 300; but in no case should the amount be less than 225 pages. Not more than 100 of these pages should be taken from readers arranged especially for beginners. For the three unit requirement not more than 600 pages in all (i.e., 300 in addition to the maximum amount for the two unit requirement) should, in general, be read; but never less than 500 pages. Not more than one work of the classical period of German Literature should be included. Besides this intensive reading, some *rapid home reading* of easier texts (100 pages or more) is strongly urged. (2) The results desired can *not* be obtained if a considerable portion of the time is spent on translation from German into English, or vice versa. (3) Features that should not be neglected are—*a.* Vocabulary: the careful study of a goodly number of common words and expressions drawn chiefly from the texts read. *b.* Frequent practice in the oral and written use of the language *without the medium of English*. This should consist partly in answering in German questions put in German, based on the texts read intensively in class, partly in reproducing in German, without the aid of questions, the contents of these texts (Freie Reproduktion).

GREEK (2 or 3)

2 Unit Requirement.—During the two years the student should acquire a knowledge of the language sufficient to enable her (1) to translate at sight simple passages of Attic prose, and to answer questions on ordinary forms and constructions; (2) to translate into Greek a passage of connected English narrative, based on Xenophon; (3) to read Greek aloud with correct pronunciation and with full expression of the sense of the passage.

The prescribed study includes—(1) Grammar: inflections; the simpler rules for composition and derivation of words; use of cases; construction of sentences, with particular regard to the use and meanings of the moods. (2) Prose Composition: regular practice in writing or speaking Greek, with at least twenty written exercises, including some connected passages. (3) Three books of Xenophon's *Anabasis*, or its equivalent.

SUGGESTIONS CONCERNING PREPARATION.—The acquiring of a good working vocabulary should begin with the first lesson, and constant practice in the use of the more common words should be kept up throughout the course. The students should learn to recognize the words by hearing as well as by sight, and should be able to use them in speech as well as in writing. Writing Greek from dictation, learning short passages by heart, and putting simple English sentences into Greek orally, or answering in Greek simple questions asked in Greek serve not only to fix vocabulary

and forms in the students' mind, but also to give them a feeling for the natural Greek form of expression.

3 Unit Requirement.—In addition to the preparation for the 2 unit requirement stated above, the student must be able to translate at sight a passage from Homer, to read it with a correct expression of the rhythm, and to answer a few questions on the Homeric forms and on the subject-matter.

The prescribed study includes: three books of Homer's *Iliad*; Prose Composition, continued practice in translation into Attic prose of connected passages of English.

ITALIAN (2, 3 or 4)

The requirements are along the lines of those for French and Spanish as stated in Document 114 of the College Entrance Examination Board.

To meet the two-unit requirement the pupil should at the end of the first year be able to read simple Italian, translate from Italian into English; ask and answer simple questions involving the prime necessities of life; write simple notes or statements. The second year should be a development of the first, stress to be laid on composition and conversation.

During the first year the work should comprise: (1) The rudiments of grammar, including the inflection of the regular and more common irregular verbs; the inflection of nouns, adjectives, participles and pronouns; the use of pronouns, adverbs, prepositions, and conjunctions and the elementary rules of syntax. (2) Written and oral exercises involving rules of grammar and forms of expression. (3) Careful drill in pronunciation. (4) Careful reading and accurate rendering of from 100-150 duodecimo pages of graduated text. (5) Memorizing from 100-150 lines of poetry with special attention to pronunciation. (6) Writing Italian from dictation.

During the second year the work should comprise: (1) More advanced grammar work with special stress on the irregular verb, the subjunctive mood, uses of tenses, and of the conjunctive pronouns. (2) Reading of from 250-350 pages of modern prose—fiction, plays or historical and biographical sketches. (3) Compositions (15-20), translations and abstracts with constant application of rules of grammar. (4) Memorizing 150-200 lines of poetry. (5) Writing from dictation. (6) Verbal reports on reading or assigned subjects.

SUGGESTIONS REGARDING PREPARATION.—(1) Grammar: verb drill, uses of tenses, of the subjunctive mood, and of conjunctive pronouns. (2) The reading should be selected with the view of giving the pupil an insight into Italian life, at the same time training in accurate pronunciation and translation. (3) The student should become accustomed to the ordinary spoken language of the class room. The subjects for composition should include biographical sketches and descriptions of views (photographs) of Italian cities.

The texts suggested are:—

Bowen's *Italian Reader*; Collodi, *Pinocchio*; Collodi, *Viaggio di Giannettino*; De Amicis, *La vita militare*; Giacosa, *La partita a scacchi*; Manzoni, *I promessi sposi*; Pellico, *Le mie prigioni*; Martinengo—Cesaresco, *Patriotti Italiani*; Morandi, *Antologia della prosa moderna*; *Le cento migliore liriche*; *Oxford Book of Italian Verse*.

SPANISH (2, 3 or 4)

The requirements follow the recommendations of the Modern Language Association embodied in Document 114 of the College Entrance Examination Board. To this document candidates are referred for information about the work to be accomplished to fulfill the requirements in the different years of preparation. The following general suggestions concerning preparation are offered:

(1) Grammar: verb drill; difference between *ser* and *estar*; use and position of pronouns; prepositions required with different verbs and adjectives; use of subjunctive and infinitive. (2) In reading, two ideas should be kept in mind: (a) accurate translation especially of idiomatic expressions; (b) a gradual development of the power to think in Spanish, by requiring the student to explain the meaning of words and phrases in Spanish and give variations of text also in Spanish. (3) From the beginning the student should gradually become accustomed to the use of the spoken language in the class room, training the ear by means of short talks on different subjects given by the teacher, and the tongue by the different methods already suggested. Original work in composition should also be required.

The texts suggested for the 2 unit requirement are:

A collection of easy short stories and lyrics carefully graded; Pérez Escrich, *Fortuna*; Ramos Carrión y Vital Aza, *Zaragüeta*; *Tres Comedias Modernas*; Pedro de Alarcón, *El Capitán Veneno*; Juan Valera, *El pájaro verde*; Palacio Valdés, *José*; José Selgas, *La mariposa blanca*; Carolina Marcial Dorado, *España Pintoresca*; the selected short stories of Pedro de Alarcón or Antonio de Trueba.

The texts suggested for the 3 unit requirement are:

A grammar; a composition-book; about 300 pages of intermediate texts which may be selected from the following: Pérez Galdós, *Marianela* or *Dña Perfecta*; Selgas, *La mariposa blanca*; Palacio Valdés, *La hermana San Sulpicio*; Isla's version of the *Gil Blas*; a collection of essays dealing with Spanish or Spanish-American life and customs; Moratín, *El sí de las niñas*; Larra, *Partir a tiempo*; plays of the Alvarez Quintero brothers, plays of Benavente.

SCIENCE

One or two units of science offered in the group of restricted electives may be chosen from the following subjects: (1) Biology, (2) Botany, (3) Chemistry, (4) Geography, (5) Physics, (6) Zoology. The require-

ments in science are met by the courses outlined in Document 114, published by the College Entrance Examination Board. The requirement in Botany may also be met by covering the main features in the course outlined in the Laboratory Guide for the introductory course at Wellesley College. Copies of this guide may be secured if desired from the office of the Board of Admission, Wellesley College.

All students offering science for admission must submit certificates concerning the laboratory work in science. Blank forms for this purpose may be obtained either directly from the College Entrance Examination Board in New York or from the Board of Admission of Wellesley College. Students are not required to submit laboratory note-books for admission credit in science. If they offer two units of science for admission and wish to be exempt from taking one of the two required sciences in college, note-books may be called for when the candidate enters college to be submitted for approval to the departments of science.

MUSIC (1)

The requirement in Music (Harmony) is met by examination at Wellesley College on the following:—(1) Knowledge of the following chords: (*a*) all the triads in the major key; (*b*) all the triads in the minor key; (*c*) the inversions of all triads; (*d*) the dominant seventh chord and its inversions; (*e*) the diminished seventh chord and its inversions. (2) Knowledge of all scales, major, minor (harmonic and melodic), and chromatic, with their proper notation. (3) Knowledge of the proper way of making a manuscript. (See "How to Write Music" by Harris, published by the H. W. Gray Co., New York.) (4) Knowledge of figured bass; this will be demonstrated by adding soprano, alto, and tenor to a given figured bass. (5) Knowledge of harmonizing a melody; this will be tested by harmonizing a given melody, adding alto, tenor, and bass. Emphasis should be placed on the harmonization of melody.

NOTE.—Students who have never studied figured bass will be given an unfigured bass to harmonize.

BIBLICAL HISTORY (1)

The requirement is met by Course I and either Course II or Course III as outlined by the Commission on Definition of Unit of Bible Study for Secondary Schools. Statements of these courses can be obtained from the Council of Church Boards of Education in the United States, 111 Fifth Avenue, New York City.

ADMISSION TO ADVANCED STANDING

Candidates for advanced standing must fulfill the requirements for admission to the freshman class, and when not entering from other colleges must pass examinations in a sufficient number of hours of work to gain full standing with the class which they wish to join. All examina-

tions on courses offered for advanced credit must be taken at Wellesley in June. Special arrangements must be made for admission to these examinations, and applications must be received by May first.

A candidate whose college credentials show that she has covered the admission requirements for the freshman class and has completed a highly satisfactory year of work at another college may, at the discretion of the Committee on Advanced Standing, be admitted without examination to the courses for which her previous training seems to qualify her. *The number of students to be admitted to advanced standing in any year is limited. The admission of all candidates for advanced standing will be on a competitive basis.*

An applicant desiring to enter under this provision must make a complete written statement of the work on which she bases her application. Blank forms of application will be furnished by the College Recorder. An application fee of \$10 is required of all applicants and no registration is recorded until this fee has been paid. (See page 125.)

Much importance is attached to the quality of the work offered. In order to be recognized as a candidate for advanced standing, a student must present evidence in the previous school and college records and in letters from former instructors that she is a student of excellent ability and unusual promise. The College Recorder will correspond with the college attended by the applicant and request her entire record and letter of honorable dismissal. The required credentials for all candidates are due July first. The decision as to the successful applicants for admission to advanced standing will be made in the summer of the year of entrance, after the reports from the various colleges have been received.

Candidates admitted from other colleges will be required to register during the first year as Unclassified Students. At least two years of residence are required to obtain the B.A. degree, of which one must be the senior year. The work of these two years must include all of the prescribed work (see pages 36, 37, 38) not covered by the credentials submitted.

All correspondence should be addressed to the College Recorder.

ADMISSION OF CANDIDATES FOR THE M.A. DEGREE

Candidates for the degree of Master of Arts must be graduates of Wellesley College or of other institutions of satisfactory standing, and must present adequate credentials as to their ability to carry on the work for the M.A. degree.

Application for admission as a graduate student in any department (including Hygiene and Physical Education) should be made upon a form which will be furnished by the College Recorder on request. It is desirable that the application be sent by May first of the year in which the student proposes to enter. It should be accompanied (1) by

the official record of admission subjects, college courses and grades, (2) by a copy of the catalogue of the institution attended, marked to indicate the courses taken, (3) if possible, by papers and reports of work.

A matriculation fee of five dollars is payable when a student is accepted as a candidate for the Master's degree. The amount of this fee will be deducted from the diploma fee of twenty-five dollars payable when the degree is received.

Eighteen scholarships, as described on page 128, are open to accepted candidates for the M.A. degree.

Circulars containing full information for graduate students will be sent on application to the College Recorder. For requirements for the M.A. degree see page 39.

ADMISSION OF STUDENTS NOT CANDIDATES FOR A DEGREE

Applicants who give satisfactory evidence of ability to pursue advanced courses of study may be admitted at the discretion of the Board of Admission, provided that they satisfy the requirements of the departments which they propose to enter. It will be noted that opportunities of prosecuting work along special lines are thus open to persons of experience and success in teaching who possess the requisite qualifications for admission to college classes.

Applicants of less maturity and acquirement are not ordinarily admitted, but if such desire admission they must expect to meet by examination the requirements prescribed for admission to the freshman class, or a full equivalent for them and to satisfy such additional requirements as are prescribed by the departments which they propose to enter. Specific statements of these requirements in Music will be found on page 108; in Hygiene and Physical Education on page 86.

All courses, graduate as well as undergraduate, are open to special students, subject to the conditions stated by the various departments; but every such student is expected to choose a primary subject to which she should devote the greater part of her time. A student who creditably completes a prescribed group of courses will be granted a certificate.

As the capacity of halls of residence is not sufficient for candidates for degrees, special students cannot be lodged in the college buildings. Comfortable homes may be found in the village at about the same expense as in college houses.

Correspondence should be addressed to the Secretary to the Board of Admission.

DEGREES

The following degrees are conferred by the Trustees upon recommendation of the Academic Council:—

Bachelor of Arts.
Master of Arts.

Requirements for the B.A. Degree

In 1925

Every candidate for the B.A. degree must complete before graduation the equivalent of fifty-nine hours. Two grades in work which reaches the passing mark are distinguished: one "*Passed*"; the other, "*Passed with Credit*." In order to be recommended for the degree of Bachelor of Arts a student must have "passed with credit" in not less than six hours in the first semester of the freshman year and in not less than nine hours in each succeeding semester. Deficiency of such work in any semester may be made good in accordance with regulations adopted by the Faculty. First-year French and first-year German may not *both* be counted among the fifty-nine hours. Neither first year French nor first-year German may be so counted if taken after the sophomore year. Second-year French, second-year German, first-year Italian and first-year Spanish may not be counted among the fifty-nine hours, if taken after the junior year. Of the fifty-nine hours required for the B.A. degree, a certain number is prescribed, the rest elective.

Philosophy should ordinarily be taken before the senior year.

II. ELECTIVE. All courses are classified in Grades I, II, III; Grade I including elementary courses and Grade III the most advanced courses. All of the fifty-nine hours not indicated in the above are elective, subject to the approval of the Faculty.

The nine-hour group must consist of at least six hours above Grade I, three hours of which must be of Grade III. The twelve-hour group must consist of at least nine hours above Grade I, six hours of which must be of Grade III. The six-hour group must include at least three hours above Grade I.

In order to be recommended for the degree of Bachelor of Arts a student must have "passed with credit" in not less than six hours in the first semester of the freshman year and in not less than nine hours in each succeeding semester. First-year French and first-year German may not *both* be counted among the sixty hours. Neither first-year French nor first-year German may be so counted if taken after the sophomore year. Second-year French, second-year German, first-year Italian and first-year

* If a student fails to pass with credit in the second semester of English Composition 101, she will be required to take an additional semester course in the sophomore year.

Spanish may not be counted among the sixty hours, if taken after the junior year. Of the sixty hours required for the B.A. degree, a certain number is prescribed, the rest elective.

I. PRESCRIBED. The following subjects are required as specified:

Biblical History	4½ hours

Philosophy should preferably be taken in the sophomore year.

II. ELECTIVE. All courses are classified in Grades I, II, III; Grade I including elementary courses and Grade III the most advanced courses. All of the sixty hours not indicated in the above are elective, subject to the approval of the Faculty with the following restrictions:

* If a student fails to pass with credit in the second semester of English Composition 101, she will be required to take an additional semester course in the sophomore year.

† One hour of this requirement is met by a one-hour course in Hygiene and Physical Education in the freshman year; the second hour is met by four periods in practical work, two periods per week in the freshman year and two in the sophomore year.

‡ If a student presents for admission one year of satisfactory biological science and one year of satisfactory physical science she will be required to take but one in college and may choose either a biological or a physical science. The biological sciences are Botany, Geology, and Zoology; the physical sciences, Astronomy, Chemistry and Physics.

Every candidate for the B.A. degree must show before graduation that she has completed

(1) Nine hours in each of two departments

or

(2) Twelve hours in one department and six in a second department

or

(3) Twelve hours in one department and six in allied courses.

Of the courses offered to fulfill this requirement, at least one full course of Grade III must be taken in the senior year. The nine-hour group must consist of at least six hours above Grade I, three hours of which must be of Grade III. The twelve-hour group must consist of at least nine hours above Grade I, six hours of which must be of Grade III. The six-hour group must include at least three hours above Grade I.

The programme in the freshman year is as follows:—

Total		16½	hours

These electives must be chosen in accordance with the prerequisites given in the department statements from the list of courses named below, subject to the following restrictions:—

(1) One elective must be a science and the second a language (if only two foreign languages are offered for admission).

(2) Two beginning courses in modern language may not be elected.

(3) Only one of the following subjects may be elected: Art, English Literature, Musical Theory, Reading and Speaking.

If 16½ hours are satisfactorily completed in the freshman year, the normal programme for the remaining years would be as follows:—

Sophomore year	16½	hours
Junior year	15	“
Senior year	12	“

If 16½ hours are not completed in both the freshman and sophomore years, a student may by special permission carry extra hours in the remaining years.

Elective courses must be chosen with great care so that changes will not be necessary. Students are held responsible for observing the requirements for the degree and the proper sequence of courses.

Students, except entering freshmen, are required to choose in May their free and restricted electives for the year following. All requests for changes of elective courses should be sent to the Dean of the College before September 15th. In general, no changes may be made after the beginning of the year.

Honors in Subjects

Students who wish to become candidates for Honors may apply in the spring of their sophomore or junior year to the special committee appointed to consider these applications.

All applications from candidates for Honors in Subjects must be accompanied by recommendations from the instructors concerned.

A student electing to study for Honors in Subjects will choose a Field of Distinction and will work in that field under the special direction of one or more of the instructors concerned who will advise her on the possible development of her Field of Distinction and will guide her in the carrying on of independent work within it.

A candidate for Honors in Subjects must take all the prescribed work. In place of the regular restricted elective she must take at least twenty-one hours in the chosen Field of Distinction. This Field of Distinction includes work in the major department and allied courses, and with the approval of the major department directing the work may include not more than three hours of research independent of scheduled courses thus giving the able student a stimulus to form habits of investigation in a manner to lead to advanced study.

Admission to Honors in Subjects will be confined to candidates whose scholarship, maturity and previous range of acquirement justify exceptional concentration. The work in the Field of Distinction for such a candidate will be subject to the following tests:

1. In general the regular tests of the courses in the Field of Distinction must be taken, including the examinations in these courses through the junior year.
2. A comprehensive examination must be taken in the student's Field of Distinction at the close of the senior year.

Requirements for the M.A. Degree

The work required of a candidate for the M.A. degree is expected to occupy her entire time for a college year and is the equivalent of fifteen hours of college work. It includes, in general, no fewer than two full courses of Grade III or their equivalent, in addition to a thesis or a report or reports based on some piece or pieces of independent work. The student should choose one major subject and not more than one minor subject, which should be related to the major; or she may, if she

prefers, do all the work in one subject. A candidate for the M.A. degree is ordinarily required to have a reading knowledge of French and of German, although another language may sometimes be substituted for one of these languages. One year of graduate work is required of all candidates for the M.A. degree, but more time may be needed for the completion of the work. Graduates of Wellesley College may do all the work in non-residence, under conditions defined in the Graduate Circular. One year *in residence* is required of all other candidates for the degree.

Information regarding thesis, final examinations, etc., will be found in the Graduate Circular which will be sent on application to the College Recorder.

COURSES OF INSTRUCTION

The following Courses of Instruction are offered by the several departments. The College reserves the right to withdraw the offer of any course not chosen by at least six students.

All courses are classified in grades, I, II, III; grade I including elementary courses and grade III the most advanced courses. Grade I courses are numbered 101, etc.; grade II courses 201, etc.; grade III courses 301, etc.

101. GENERAL BOTANY. This course is designed to bring the student into sympathy with the plant world, to cultivate the power of careful observation, to give a knowledge of the fundamental principles of plant life and plant breeding. The course is developed on purely scientific

lines, but, at the same time, it seeks so to relate our study of plants to all life as to give the student that familiar and intimate acquaintance with her living environment which makes for the broadest culture of to-day. As a basis for acquaintance with the nature and work of plants, the structure and development of plants are studied from seed germination to fruit formation, and the more simple physiological responses are investigated. The course has an "Outdoor Laboratory" where each student is responsible for a definite plot of land which she plants in early spring and studies throughout the season. Students are trained to know the herbaceous plants in their spring condition, to recognize the early flowers, and to know our common trees both in their winter and in their summer aspect.

Open to freshmen, sophomores and juniors. Three hours a week for a year.

MISS FERGUSON, MISS BLISS, MISS SAWYER,
MISS THOMAS, MISS HOWARD.

201. EVOLUTION OF PLANTS. This course seeks to give a general survey of the plant kingdom by means of the study of representative plants of the various phyla. The study of these plants is supplemented by readings and discussions of the general principles and theories of evolution. There will be field trips for the purpose of studying plants in their natural habitats and securing experience in the technique of collecting and pressing plant material.

Open to students who have completed course 101 or its equivalent and to juniors and seniors without prerequisite. Three hours a week for a semester; offered in both semesters.

MISS BLISS, MISS OTTLEY.

202. ELEMENTARY PHYSIOLOGY. A study of the growth and development of seedlings and mature plants, including flowering and seed formation, from the standpoint of the principal processes concerned and the chief influences of the environment upon them. In general, the plant is considered from the biological point of view as a responsive and self-adjusting mechanism; details of the chemical and physical reactions involved receive only superficial treatment.

Open to students who have completed course 101 or its equivalent and to juniors and seniors without prerequisite. Three hours a week for a semester; offered in both semesters.

MR. PULLING.

203. TAXONOMY AND GEOGRAPHICAL DISTRIBUTION OF THE SPERMATOPHYTES. This course aims to give the student acquaintance with the Seed-plants of our local flora. Special attention is given to the principles underlying the natural classifications and relationships of the different families, to the historical development of taxonomy from the early herbalists to the present day, and to a general consideration of the factors which have been operative in determining the present geo-

graphical distribution of higher plants. In so far as possible the work will be carried on in the field.

Open to students who have completed course 101 or 201 or 202. Three hours a week for a semester; offered in both semesters. MISS OTTLEY.

204. CULTIVATED PLANTS. This course gives an opportunity for a scientific study of garden plants, their classification, structure, ecology, and physiology, as a basis for their use under various cultural conditions. The lectures are accompanied by laboratory practice in the application of the principles of propagation, nutrition, and general culture of plants, including their requirements of soil, moisture, light, heat, etc., both out of doors and in the greenhouse. Greenhouse management is taken up, and some of the special problems of school gardening are considered. The field work is a study not only of the cultivation of plants but also of the natural plant societies, and the artistic value of the various plant forms, textures, color and flower effects as elements of design.

Open to juniors and seniors who have completed course 201 or its equivalent. Three hours a week for a semester; offered in both semesters. MR. ADAMS, MISS SEELYE.

It includes a brief history of the science and a consideration of the relation of bacteria to medicine, public health and agriculture. It is designed as a general culture course and is not intended for those who desire a technical knowledge of the subject. The course consists chiefly of lectures, supplemented by laboratory work. It does not count as part of the science requirement.

Open to juniors who have completed one year of either Botany, Chemistry or Zoology, and to seniors without prerequisite. Three hours a week for the first semester. MISS SNOW.

and reproductive organs, and to a consideration of the homologies of sporogenous, reproductive, and embryonal parts. The genetic relationships of plants, both fossil and living, are carefully considered. Students will become acquainted with the technique of plant histology and embryology by preparing a considerable proportion of the microscopic slides used in the class room.

The course is divided into a study of (1) plant formations which have arisen in response to climatic conditions, and (2) local plant associations which have resulted from physiographic changes. This study includes a consideration of the various modifications of plant structure found under different environmental conditions.

Open to juniors and seniors who have completed courses 201, and 202 or 203. Three hours a week for the first semester.

MISS SNOW.

306. PHYSIOLOGY. Experiments, lectures, discussions, and readings designed to acquaint the student with the higher plants as working organisms. The experiments embody problems in, to a greater extent than demonstrations of, the fundamental activities of the higher plants in relation to their environment. It is planned that increased precision in laboratory manipulation shall keep pace with the student's growing knowledge of physiological methods.

Open to juniors and seniors who have completed six year-hours of Botany in college and who have completed or are taking a year of either Chemistry or Physics. The prerequisite in Botany must include courses 201, and 202 or 203. Three hours a week for a year.

MR. PULLING.

307. CYTOLOGY AND GENETICS. Studies in the structure of the cell; the phenomena of cell division; the constitution of the repro-

ductive cells with special reference to the theories of heredity and evolution. The relation between definite cell structures and visible body characteristics forms the underlying principle of study and experimentation. At the beginning of the year each student will be assigned a practical problem in plant breeding as a basis for the study of the behavior of pure lines in hybridization and the origin and transmission of characters.

Open to juniors and seniors who have completed six year-hours of Botany in college. This prerequisite must include either course 302 or 201 with 202 or 203. Three hours a week for a year.

Although the course is designed especially for those students who contemplate a continuance of technical work, a large proportion of informational material is combined with the study of standard methods.

Open to juniors and seniors who have had one year of Chemistry and either one year of Botany or Zoology, or a second year of Chemistry. Three hours a week for the year.

MISS SNOW.

309. LANDSCAPE GARDENING. The work of this course continues the study of ornamental plants begun in course 204, placing special emphasis upon their use in landscape gardening. The development of the great historical styles in garden design, and the fundamental principles governing art are studied as a basis for the appreciation of modern landscape architecture and its function in the advancement of civilization. The problems of city planning are discussed from the standpoint of the æsthetic and recreational requirements in both urban and rural communities. The laboratory practice gives training in methods of developing the landscape plan as adapted to the small estate. This course is intended primarily to give an intelligent appreciation of landscape gardening as a fine art.

I. Courses Prescribed for the Certificate of the Department

(1) A two years' course especially designed for the training of teachers of hygiene and physical education and leading to the certificate of the Department of Hygiene and Physical Education is offered to graduates of approved colleges. In order to be admitted to this course candidates must be without organic disease or serious functional disorder. A keen sense of rhythm is necessary, and also the ability to use the voice with ease and power. Previous courses in Chemistry, Physics, Psychology and Education are essential. If only two of these are offered for admission, opportunity will be given in the first year to take Chemistry 101 or Physics 101, or Psychology 101 and Education 201 (second semester).*

Courses leading to the degree of M.A. may be completed while in residence for the certificate. Detailed information will be found in the Circular of the Department or the Graduate Circular.

(2) A five years' course is offered leading to the B.A. degree and the certificate of the Department of Hygiene and Physical Education. This course

The Wellesley College Choir of forty members, founded in 1900, furnishes the music for the Sunday services in the Memorial Chapel. Any student with a good natural voice is eligible for membership; trials to fill vacancies are held at the opening of each College year.

The college Symphony Orchestra, consisting of about thirty student and faculty members, was founded in 1906. It offers advantages of competent instruction in ensemble playing under a professional conductor. It gives one or two concerts a year with a programme of classical music.

Any members of the College who have sufficient technique are admitted to membership.

A limited number of tickets for reserved seats at the concerts of the Boston Symphony Orchestra in Symphony Hall, Boston, are free to students in the department who are able to use them profitably.

I. Musical Theory

The courses in theory and history are open to all students without regard to previous musical knowledge, and count toward the B.A. degree. The history and theory courses are subject to no separate tuition fee. Courses 102, 206, 305, 306, 307, and 308 are designed especially for those students desiring to gain an appreciative knowledge of musical literature.

101. **ELEMENTARY HARMONY.** This course is designed for freshmen who enter college with the intention of specializing in music. It may be followed by course 201, but not by course 102. This course covers musical notation, the formation of triads and chords of the seventh, the invention of melodies and their harmonization, the simpler kinds of non-harmonic tones, elementary form, and ear training. Carefully kept notebooks are a part of the work.

Open only to freshmen who are taking practical music. No prerequisites. Two hours a week for a year.

MR. HAMILTON.

102. **INTRODUCTORY HARMONY.** This course covers the ground necessary for admission to course 201 or 305, and also offers a substantial foundation for subsequent work in practical or theoretical music. It includes the material of the ordinary elementary harmony course and in addition emphasizes ear training and harmonic analysis. This course is not open to students who have taken course 101.

Open to sophomores, juniors, seniors, and advanced freshmen (five-year music course). No prerequisites. Three hours a week for a year.

MR. MEYER.

103. **INTERPRETATION.** This course is a training in the principles of interpretation, developed through the performance in class of music studied with the private teacher and by listening to and analyzing compositions performed by others. The course concerns itself with the recognition of the simple cadences, harmonic figuration as applied to the accompaniment, the broader rhythmical distinctions, the relations of melody and accompaniment, the school of the composer, biographical data, and the simpler elements of form.

NOTE.—Students wishing to elect the course should apply directly to the head of the department.

Students may elect practical music without electing the course in interpretation; but no one may elect the course in interpretation without at the same time electing practical music.

Open to sophomores, juniors, and seniors who are at the same time taking lessons in practical music in the department and who have acquired a satisfactory degree of skill. One hour a week for a year.

MR. MACDOUGALL, MR. HAMILTON.

201. **ADVANCED HARMONY.** This course covers *in extenso* the various classes of non-harmonic tones, chords of the ninth modulation, elementary orchestration, writing for the piano, organ, and for voices. The course aims to give facility in elementary composition.

Open to students who have completed course 101 or 102 or the equivalent. Three hours a week for a year.

MR. MACDOUGALL.

202. **APPLIED HARMONY.** (Not offered in 1924-25.) This course aims to realize synthetically at the pianoforte the principles taught in course 201, following what may be termed a laboratory method.

NOTE.—Instruction will be given in small classes of not less than three students. The course is in no sense a substitute for pianoforte lessons. Students must satisfy the head of the department that they have a pianoforte technique adequate for the work; in general, the ability to play the easier Mendelssohn Songs without Words, and to read hymn tunes accurately at sight will be sufficient.

Open to those students only who are at the same time taking course 201. Two hours a week for a year.

MR. HAMILTON.

204. **INTERPRETATION.** (Not given in 1924-25.) This course is a continuation of course 103. The subject-matter of the course is the thematic and polyphonic melody, the larger forms, harmony in its æsthetic bearings, the æsthetic effects of the more complicated rhythms, comparative criticism and the various schools of composition. See note to course 103.

Open to students who have completed course 103 and who are at the same time taking lessons in practical music in the department and have acquired a satisfactory degree of skill, also by special permission to seniors. One hour a week for a year.

MR. MACDOUGALL, MR. HAMILTON.

206. **HISTORY OF MUSIC.** Lectures on the history of music of all nations, with assigned readings and frequent musical illustrations, from which the student is taught to compile analytical programs and critiques. The course is non-technical and no previous knowledge of music is re-

quired. It is not open to students who have taken or are taking course 305.

Open to juniors and seniors, and to sophomores who have had one course in the department. Three hours a week for a year.

MR. HAMILTON.

301. COUNTERPOINT. Counterpoint in two, three, and four voices; double counterpoint; analysis; the distinction between strict (modal) and free counterpoint; the rules for the latter deduced from contemporaneous practice; fugue for two and three voices.

Open to students who have completed course 201. Three hours a week for the first semester.

MR. MEYER.

302. MUSICAL FORM. This course aims to cover the various imitative forms, the suite and sonata forms, the large forms of vocal and orchestral music. Students have the opportunity of doing practical work in composition (song form, sonata movements, etc.).

Open to students who have completed course 301. Three hours a week for the second semester.

MR. MEYER.

303. APPLIED COUNTERPOINT. (Not offered in 1924-25.) This course aims to realize synthetically at the pianoforte the laws of simple and double counterpoint by the constant playing and analysis of the best examples from the masters. See note to course 202.

Open to those students only who are at the same time taking course 301. Two hours a week for the first semester.

304. APPLIED FORM. (Not offered in 1924-25.) This course aims to play and to analyze a great number of specimens of the various forms, with careful analysis and classification. See note to course 202.

MR. MACDOUGALL.

306. BEETHOVEN AND WAGNER. An intensive course devoted to the analyses of selected pianoforte sonatas, chamber music, the symphonies

of Beethoven, "Fidelio," and the operas of Wagner. The aim of the course will be to give an intimate knowledge of the two composers' works and to estimate their place in musical history.

MR. MACDOUGALL.

II. Practical Music (Instrumental and Vocal Lessons)

Attention is called to the fact that a student need not necessarily spend five years in college in order to carry on practical music at the same time with the academic course. See (a) following.

It is believed that students having a command of pianoforte or organ technique will be able to profit by the theoretical instruction given in the department to a fuller degree than those without such a technique. To encourage students to acquire a technique, as well as to furnish authoritative instruction, the department undertakes to give lessons in pianoforte, organ, violin, and violoncello playing, and in singing. Attention is called to the fact that students who elect Musical Theory 103 and 204, are thereby obtaining two hours' credit toward the B.A. degree in connection with work done in practical music. It is offered to all students, whether candidates for degrees or not, as stated below:—

(a) *Candidates for the B.A. degree who propose to spend but four years in college may take practical music*, provided that they obtain each year the permission of the Dean of the College as well as of the Professor of Music; they must also take a full course in Musical Theory, unless they have completed two two-hour or three-hour courses in the subject.

(b) *Candidates for the B.A. degree who are willing to devote five years to the college course* will be permitted to take practical music each year of the course, governed by the restriction laid down in (a).

(c) *Candidates for the B.A. degree who wish also the Certificate of the Department of Music* should plan to devote *five years to the college course*. Such students are required to take practical music, two lessons a week, throughout the five years. They must complete, satisfactorily to the department, a course in the literature of the instrument chosen or of the voice; they must apply for the certificate at least three years in advance.

(d) *Students not candidates for the B.A. degree who desire to specialize in music* must meet the requirements prescribed for admission to the

freshman class, and must in addition pass an entrance examination in Harmony. Special students must take both Musical Theory and vocal or instrumental lessons, two a week, with not less than twelve hours of weekly practice. They must also take from six to nine hours per week of academic work, including Musical Theory, as may be decided in consultation with the Dean of the College.

(e) Students not candidates for the B.A. degree who wish the *Certificate of the Department of Music* must comply with the conditions laid down in (d); moreover, the academic work taken must include modern languages. Such students must apply for the certificate on entering the department, and must have already acquired the fundamental technique of the instrument chosen or of the voice. The time occupied in study for the certificate depends upon the talent, upon the proficiency of the student at entrance, and upon her subsequent diligence; but in general four years at least are necessary. The various courses are so arranged that the pupil on completion will have an acquaintance with the best musical literature.

(f) Graduates of Wellesley College or of other institutions may make special arrangement for instrumental or vocal lessons.

(g) Permission to practice in Music Hall cannot be given to students not regularly registered in the department.

(h) Students whose progress is not satisfactory may be required to discontinue their lessons.

101. THE BIOLOGY OF ANIMALS. This course serves as an introduction to the general principles of Zoology. The study of a series of animal forms, of increasing complexity, develops a conception both of what an animal is, and of how animals have arisen through evolution in the past. Through the application of biological principles to man the student obtains gradually a knowledge of the human machine, a sense of the place of man in the world of living things, and some comprehension of the steps by which he has arisen. Based upon and supplementing the data gained in the laboratory at first hand, there runs through the second semester a series of lectures and discussions on the evidences and factors of evolution, on heredity and eugenics.

FELLOWSHIPS AND SCHOLARSHIPS

A. For Graduates

THE ALICE FREEMAN PALMER FELLOWSHIP, yielding an income of about \$1,000, was founded in 1903, by Mrs. David P. Kimball.

The holder of this Fellowship must be a graduate of Wellesley College or some other American College of approved standing, a young woman of good health, not more than twenty-six years of age at the time of her appointment, unmarried throughout the whole of her tenure, and as free as possible from other responsibilities. The same person will not be eligible to the Fellowship for more than two years.

The Fellowship may be used for study abroad, for study at any American college or university, or privately for independent research. Several times during the period of tenure the holder of the Fellowship must furnish evidence that it is used for purposes of serious study and not for general culture; and within three years from entrance on the Fellowship she must present to the faculty a thesis embodying the results of the research carried on during the period of tenure.

Applications for this Fellowship should be received by the President of Wellesley College not later than February first of the academic year preceding that for which the Fellowship is asked. These applications must be accompanied by theses or papers presenting evidence of the most advanced work of the candidates, since the Fellowship is not assigned on the basis of unsupported credentials, however commendatory.

THE HORTON-HALLOWELL FELLOWSHIP is offered by the Alumnae Association of Wellesley College. This fellowship is in honor of Mary E. Horton, Wellesley's first professor of Greek, and Susan M. Hallowell, Wellesley's first professor of Botany, and is available to those holding the B.A. or M.A. degree from Wellesley, for graduate study in candidacy for the M.A. or Ph.D. degree, or for independent research of equivalent standard.

Application should be made by personal letter from the candidate. This should be accompanied by a certified record of her college work, testimonials from instructors as to ability and achievement in the lines of study proposed, testimonials from qualified judges as to health and character, and specimens of scientific or literary work in the form of publications, papers, notes, outlines, collections, etc.

Applications for this fellowship should be received by the Chairman of the Fellowship Committee, Alumnae Office, Wellesley College, not later than February fifteenth of the academic year preceding that for which the fellowship is asked. The amount of this fellowship has been fixed for 1924-25 at \$1,000.

THE RUTH INGERSOL GOLDMARK MEMORIAL FUND was established by Mr. C. J. Goldmark in 1917 to aid deserving students doing graduate work at Wellesley College or elsewhere in English Literature or English Composition or the Classics, English Literature being given the preference. The income at present is \$250.

Applications for aid from this fund should be received by the Chairman of the Department of English Literature, not later than April first of the academic year preceding that for which the aid is asked.

RESEARCH FELLOWSHIP FOR THE STUDY OF ORTHOPEDICS IN RELATION TO HYGIENE AND PHYSICAL EDUCATION, amounting to \$1000.

The general requirements to be met by applicants are as follows:—good health, the Bachelor's degree from a college or university of good standing; sound preparation in chemistry, physics, and biology; special preparation in anatomy, kinesiology and physiology; familiarity with the elements of orthopedic theory and practice; and an insight into some one or more of the problems of orthopedics as related to hygiene and physical education.

The work on the problem chosen in consultation with the department must be done in residence at Wellesley College. It will, in general, begin in the September following the acceptance of the applicant and will continue through one calendar year. It will involve kinesiology, applied physiology, and the study of clinical material. For the latter, opportunity will be provided to study the work of orthopedic surgeons in Boston and other eastern cities. The results of the investigation are to be embodied in a thesis to be submitted to the department and published.

Applications for this fellowship should be received by the Director, Department of Hygiene and Physical Education, Wellesley College, Wellesley, Mass., not later than March first of the academic year preceding that for which the fellowship is asked. The decision reached by the department will be based upon the applicant's record, upon personal correspondence, and when possible, upon personal interviews.

EIGHTEEN GRADUATE SCHOLARSHIPS TO THE VALUE OF \$300 A YEAR, the equivalent of one year's tuition, have been established for the benefit of approved candidates for the M.A. degree in residence at Wellesley.

Application for one of these scholarships should be made by personal letter from the candidate to the Chairman of the Committee on Graduate Instruction, Wellesley College.

GRADUATE STUDY IN CLASSICS:—

The American School of Classical Studies in Athens offers special opportunity for graduate study in Greek. Membership, without tuition*, is open to all graduates and graduate students of Wellesley College who have done sufficient work in Greek and Archaeology to profit by the opportunity. The object of the School is to furnish an opportunity to study in Greece the literature, art, antiquities and history of the country under suitable guidance; to prosecute and to aid original research in these subjects; and to conduct the exploration and excavation of classic sites. Three fellowships of \$1000 each are awarded annually on the basis of competitive examinations and are open to graduates of the co-operating colleges of which Wellesley College is one. For further information apply to Professor Edwards.

The American School of Classical Studies in Rome is an integral part of The American Academy. The object of this School is to promote the study of classical literature in its bearing upon antiquities and history; of classical, Etruscan and Italian art and archaeology, including topography, palaeography and epigraphy, and of the art and archaeology of the early Christian, Mediaeval and Renaissance periods within the boundaries of Italy. It furnishes regular instruction and guidance in some or all of these subjects, encourages and assists in original research and exploration. Students should have the ability to read ordinary Greek and Latin prose at sight and to use French and German as instruments of research; they will find an elementary knowledge of Italian very useful. Duly qualified graduates of Wellesley College are exempt from any charge for tuition. Two Fellowships in the School of Classical Studies are offered by the Academy, one of the value of \$1,000. for one year and one of the value of \$1,000. a year for two years. The academic year begins on the first day of October and students are expected to report in Rome at the Academy on that day. A Summer School established in 1923 offers a programme of great value for students and teachers of the classics. For further information application may be made to Professor Hawes.

SCHOLARSHIPS IN THE MARINE BIOLOGICAL LABORATORY AT WOODS HOLE.—Admission to courses at Woods Hole is upon a selective basis. Wellesley College offers annually two scholarships to applicants who are successful candidates. This laboratory is primarily for research, but in the summer courses of instruction are offered, four in Zoology and one in Botany. The purpose of these courses is to aid in the production and training of investigators, and first consideration is given to persons

who, whether graduate or undergraduate, give promise of contributing to the advancement of science. Applicants must have completed a college course in the subject in which they wish to work. The laboratory offers besides these courses of instruction, opportunity for research, either under direction or independent. In addition, there are courses of lectures on special topics and on subjects of general biological interest.

Applicants should state the character of the work to be done, whether botanical or zoological, whether courses of instruction are desired, or investigation directed. All applications should be forwarded to Professor Ferguson or Professor Hubbard in time to reach Wellesley College before April first. These applications will be forwarded to Woods Hole to be acted upon May fifteenth, after which date notification will be sent to the successful candidates.

THE LORETTO FISH CARNEY MEMORIAL FUND was founded in 1920 by the alumnae and staff of the Boston Normal School of Gymnastics and the Department of Hygiene and Physical Education of Wellesley College, the income to be awarded to a senior in the department at the discretion of the teaching staff of the department and the President of the College. (Accumulating.)

THE AMY MORRIS HOMANS SCHOLARSHIP FUND of \$6000, presented in 1924 by the Mary Hemenway Alumnae Association of the graduate department of Hygiene and Physical Education in honor of Miss Amy Morris Homans, pioneer and leader in physical education in the United States, to be awarded to a student in the graduate department of Hygiene and Physical Education who is in need of assistance and shows proficiency and promise.

These scholarships are in general not competitive. They are awarded in recognition of genuine pecuniary need and of satisfactory character, college citizenship, health, and intellectual and practical ability as tested by a year or more of life and study at Wellesley. The foundations are of varying amounts, and the income is apportioned according to need and merit as justly as possible. No scholarship yields the full amount required for both tuition and residence on the ordinary plan. Although there is no special provision for scholarship aid during the freshman year, any school principal or teacher having in view a candidate, thoroughly prepared for college and desirable in every respect, yet unable to enter on account of lack of means after every effort to secure funds has been made, is advised to let the case be known to the Administration of the College, since it is often possible to make some suggestion which proves to be of advantage.

A co-operative house is open to self-helping students but is not of sufficient capacity to provide for freshman applicants as well. A system of student waitresses is also in operation, and freshmen can often avail themselves of the opportunity of self-help thus afforded. A descriptive circular will be mailed on application.

The Christian Association of the College is actively engaged in bringing students into connection with work to be done for compensation within the College and in the neighborhood, but such employment, since it makes a distinct draft upon strength and time, is hardly to be advised for the freshman year.

Another source of pecuniary aid is in the work of the Students' Aid Society established by the founders of Wellesley and revived and incorporated by the alumnae of the College in April, 1916. The Wellesley College Loan Fund, established in 1908 through contributions from alumnae and other friends of the College, is included in the resources of the Students' Aid Society. Small amounts are loaned to students without interest in expectation that these students will repay as soon as they are able. Assistance is often given partly in gifts and partly in loans. The existing funds are not sufficient to meet the wants of deserving applicants, and contributions of any amount will be gladly received by the treasurer, Miss Mary Caswell, Wellesley College.

EQUIPMENT

Founders Hall, a building for lecture rooms and department offices pertaining to instruction in the Liberal Arts, was opened for use in September, 1919. The hall was built from the Restoration Fund, secured for the College through trustees, faculty, alumnæ, and other friends, and replaces in some part College Hall, the first and main building of the College, destroyed by fire, March 17, 1914. The building is dedicated as a memorial to the Founders of the College, Henry Fowle Durant and his wife, Pauline Adeline Durant.

Founders Hall is the first achieved member of a group of academic buildings designed by Messrs. Day and Klauder of Philadelphia and to be completed as soon as funds allow.

The Library of the College, endowed by Eben Norton Horsford, now numbers over 100,000 bound volumes, including the departmental libraries. The books in the General Library building form a collection chosen primarily for the use of students and instructors in the college courses in Literature and Languages, History, Economics, Sociology, Philosophy, Education, Religious History and certain of the sciences. The General Library is open on week days from 8:10 A.M. to 9:30 P.M., and on Sundays from 2:30 to 5:30 P.M. Students have direct access to the shelves. The Library is catalogued by author and subject entries, and the most recent and useful bibliographical aids are provided; special effort is made to train students in methods of research.

The Library subscribes for about three hundred and eighty American and foreign periodicals, including daily newspapers representing different sections of the United States besides representative British and Continental dailies.

The Library has also many special collections of great interest and value to the student doing graduate or other research work. Among the most valuable of these are the Plimpton Collection established by Mr. George A. Plimpton in memory of his wife, Frances Pearsons Plimpton, of the class of 1884, which comprises 953 volumes of Italian books and manuscripts chiefly of the Renaissance; the Ruskin Collection, the gift of Mr. Charles E. Goodspeed, and the Collection of Early and Rare Editions of English Poetry given for the most part by Professor George Herbert Palmer.

The Brooks Memorial Room, opened in 1921, provides comfortable and beautiful surroundings with carefully selected books for leisure hours of reading.

The following collections are placed in the buildings of the respective departments:

Art Library	3085 vols.	Astronomy Library ...	1297 vols.
Botany Library	1265 "	Chemistry Library	941 "
Hygiene Library	3078 "	Music Library	1442 "

Farnsworth Art Building and Art Collections.—The Farnsworth Art Building, the gift of the late Isaac D. Farnsworth, was opened in September, 1889. Besides lecture rooms, galleries for collections, and studios for drawing and painting, a special feature is the arrangement of laboratories and libraries, so that the books and art material relating to particular subjects and periods can be made immediately available to general students.

The Art Collection consists of a large number of photographs and other material, including the James Jackson Jarves collection of laces and vestments; the M. Day Kimball Memorial, consisting of original pieces of antique sculpture; a few examples of early Italian painting, including an early Sienese painting, the gift of Mrs. William H. Hill; a collection of Indian baskets, the gift of Mrs. Rufus S. Frost; various Egyptian antiquities obtained through the kindness of the late Mrs. John C. Whitin, including certain interesting papyri; and scarabs and seals from the collection of Dr. Chauncey Murch, the gift of Mrs. Helen M. Gould Shepard; two Renaissance sculptured columns, the gift of Mr. William C. Safford; the Stetson collection of modern paintings, and a few other examples. A movement has been started to develop the museum collections further, and to make the museum into a center of beauty for the College.

The collection of photographs and other reproductions numbers over sixteen thousand.

Music Hall and Billings Hall are large brick buildings, devoted to the department of Music. Music Hall contains offices, studios, and practice rooms equipped with thirty-seven new pianos of standard makes, a victrola and three player-pianos; also a large room, containing a two-manual pipe organ for the use of the organ pupils. Billings Hall, opened in 1904, contains the office of the Professor of Music, the library and class rooms for instruction in Musical Theory; also a concert room, seating four hundred and ten people, and containing the Grover organ,—a large three-manual organ, rebuilt and modernized.

The Music Library includes a collection of manuscripts, about two hundred scores (Symphony, Opera, Oratorio, and Cantata), two hundred songs, three hundred piano arrangements (two, four, and eight hands), besides seven hundred and fifty reference books on musical subjects. The department owns one hundred records for the victrola and three hundred records for the player-pianos.

Laboratories and Scientific Collections

Astronomy.—The Whitin Observatory is a one-story building of brick, faced with white marble, situated on a small hill on the college grounds, and devoted entirely to the use of the department of Astronomy. It contains two rooms surmounted by rotating domes, twenty-five feet and twelve

and one-half feet in diameter respectively; two transit rooms; a spectroscopic laboratory; a large, well-lighted room for elementary laboratory work; and another large room in which is kept the department library. In the larger dome room is mounted a twelve-inch Clark equatorial refracting telescope, which is provided with a filar micrometer, a polarizing photometer, and a six-prism spectroscope. The twenty-five foot dome is rotated by an electric motor. The smaller dome contains a six-inch Clark equatorial refractor. There are two transit instruments, the larger a Bamberg prismatic transit of three inches aperture. A four-inch telescope with objective by Browning is mounted in a south wall of the building, with the eye end inside and the optic axis parallel to the axis of the Earth; a plane mirror beneath the object-glass reflects into the latter the light of the object observed. In the spectroscopic laboratory is a Rowland concave grating spectroscope of six feet focal length. The Observatory is supplied with two Howard sidereal clocks, a Bond mean-time chronometer, and two chronographs, any of which may be connected electrically through a switchboard with keys near the various telescopes; a Berger surveyor's transit; an Evershed protuberance spectroscope; a Gaertner comparator for measuring spectrograms; a projecting lantern and about 700 astronomical lantern slides; and a large collection of illustrative apparatus and photographs.

The Observatory House, the residence of the Observatory staff, is near by. Both the Observatory and the house, and also the greater part of the astronomical equipment, are the gift of the late Mrs. John C. Whitin.

Botany.—The department of Botany has well-equipped laboratories and a range of modern greenhouses.

The illustrative collections comprise an herbarium of some sixty thousand sheets, including the lichen collection of the late Professor Clara E. Cummings; also a collection of woods, fruits, and economic vegetable products; three hundred ninety-three charts by Henslow, Kny, Dodel, Tschirch, and others, including a number made by members of the department staff; a collection of about one hundred Auzoux and other botanical models; Brendel's glass models of cryptogams; seventeen hundred water color paintings of North American plants by Helen Frances Ayres; a large collection of lantern slides and microscopic mounts; and about five thousand museum specimens. The department has an "Outdoor Laboratory" for the use of certain courses. The greenhouses contribute to all the courses in the department, but are of especial importance in connection with the work in landscape gardening, physiology, ecology, taxonomy and genetics. The native flora about Wellesley is easily accessible, furnishing a convenient field for both the taxonomist and ecologist. The library is well supplied with reference works and with current periodicals.

Chemistry.—The department of Chemistry occupies a separate building, which contains two lecture rooms and the chemical library, in addition to the rooms fitted up for laboratory work. Separate laboratories are provided for work in general chemistry, organic chemistry, qualitative and quantitative analysis, and food analysis. The building is conveniently arranged and well equipped with necessary apparatus and appliances.

Geology and Geography.—The department of Geology and Geography has a large and well-equipped lecture hall provided with a Leitz epidiascope for lantern slide and opaque projection, a good sized class room, and two laboratories, one for the use of geography classes, the other for work in geology.

The Geology Museum contains a typical college collection of dynamical, structural, and historical geology specimens,—a systematic collection of minerals arranged according to Dana, and a systematic collection of rocks. There are three collections arranged for class-room use,—one each in mineralogy, petrology and structural and historical geology. These collections are all the generous gifts of colleges, museums, and friends. The department has two noteworthy collections. The first is the Horace I. Johnson Mineral Collection, which consists of five thousand valuable and beautiful mineral specimens, including many precious metals and stones. This collection is the gift of the late Mr. John Merton, and was presented through the Class of 1915 by the courtesy of Miss M. Helen Merton. The second is the Reverend David F. Pierce Collection, which includes a complete and rare collection of building and ornamental stones and many precious and semi-precious minerals. This collection is the gift of Professor Frederick E. Pierce of Yale, Miss Anna H. Pierce, and Miss Mary E. Pierce of the Class of 1898. The maps of the department include wall maps of different countries and sections of countries; all the United States Geologic Folios, and ten thousand topographic maps of the United States Geologic Survey. Five thousand of these latter maps are arranged in groups to illustrate geographic types. The department has four thousand lantern slides which illustrate all phases of geology and geography.

Hygiene and Physical Education.—The Department of Hygiene and Physical Education occupies Mary Hemenway Hall on the western border of the college grounds. It is designed to meet the requirements of the course for the training of teachers, and to provide practical instruction for the entire College. The equipment includes large, well-lighted gymnasiums with ample bathing facilities, administrative offices, class rooms, and laboratories for anatomy, physiology, bacteriology, hygiene, anthropometry, corrective exercise, and research. The department library contains 3300 volumes, a collection of valuable pamphlets, and regularly receives twenty-nine journals dealing with matters related to

hygiene. Immediately adjoining Mary Hemenway Hall are tennis and archery courts, basket ball, baseball, volley ball, and hockey fields, with room for further expansion. Lake Waban furnishes facilities for rowing, swimming and skating. There is a golf course with a clubhouse. The equipment of the department is designed for the application of modern science to the maintenance and promotion of health and for education through motor activity.

Mathematics.—The unusually large and fine collection of Mathematical Models, destroyed by fire in March, 1914, has at last been replaced by a smaller but very useful set of Brill-Schilling models of surfaces of the second, third and fourth orders, executed chiefly in thread, in celluloid, and in plaster.

Physics.—The department of Physics occupies temporary quarters consisting of two conveniently arranged lecture rooms, fitted with direct and alternating current and gas, and laboratories for general physics, electricity, heat, and light. The equipment is thoroughly modern. The lecture apparatus is sufficient to permit a wide range of experimental lectures. In the elementary laboratory duplication of apparatus permits a close co-ordination between lectures and laboratory exercises. The equipment for advanced laboratory work is especially strong in electrical, optical, and acoustical apparatus. It includes an unusual equipment for experiments in electromagnetic waves and radio communication.

Psychology.—The temporary Psychology Laboratory contains ten rooms, including a dark room. The equipment is adequate for demonstration, for general experimental work, and for many lines of research.

Zoology.—The department of Zoology is housed in a temporary building. This building contains laboratories for the elementary course in zoology, for histology and embryology and for physiology. The courses in anatomy are conducted in the laboratories in Mary Hemenway Hall. The equipment lost in the fire of March, 1914, is being replaced as rapidly as conditions permit. The fundamental needs of the various courses have been met, and the physiology laboratory in the new wing is fully equipped with modern apparatus. The nucleus of a new museum has been formed, and additions are being made as fast as funds and the lack of adequate fire-proof space allow. A collection of New England birds, and a valuable collection of shells, the gift of Mrs. Rebecca S. Beaman, of Cambridge, are housed in a basement room of the Library.

HONOR SCHOLARSHIPS

Honor Scholarships (without stipend) have been established by the College for the purpose of giving recognition to a high degree of excellence in academic work. These honors fall into two classes: students in the first, or higher class, are termed Durant Scholars; students in the second class are termed Wellesley College Scholars.

These honors are awarded to seniors on the basis of two and one-half years' work, to juniors on the basis of one and one-half years' work. The standard in each case is absolute, not competitive.
